

Tugas Pertemuan 7

1. Tampilan aplikasi pada project sebelumnya

2. Code App.js

```
import React from 'react';
import './App.css';
import 'bootstrap/dist/css/bootstrap.min.css';
import Navbar from './components/Navbar';
import CustomCard from './components/CustomCard';
import mhsPhoto from './img/mhs.jpg';

function App() {
  return (
    <div className="App">
      <Navbar />
      <header className="App-header">
        <h1>Welcome to React with Bootstrap</h1>
        <br></br>
        <CustomCard
          title="Yohanes Dimas Pratama"
          text="Saya adalah seorang mahasiswa Udinus angkatan 2021, yang
pada saat ini sedang menyelesaikan semester 6 "
        />
      </div>
    );
}
```

```

        imageSrc={mhsPhoto}
      />
    </header>
  </div>
);
}

export default App;

```

3. Code CustomCard.js

```

import React from 'react';
import Card from 'react-bootstrap/Card';

function CustomCard({ title, text, imageSrc }) {
  return (
    <Card style={{ width: '18rem' }}>
      <Card.Img variant="top" src={imageSrc} />
      <Card.Body>
        <Card.Title>{title}</Card.Title>
        <Card.Text style={{ fontSize: '14px' }}>{text}</Card.Text>
      </Card.Body>
    </Card>
  );
}

export default CustomCard;

```

4. Tampilan hasil menjalankan aplikasi
